

Cqrs.Configuration.IDependencyResolver

```
graph BT; A[Cqrs.Ninject.Configuration.NinjectDependencyResolver] --> B[Cqrs.Configuration.IDependencyResolver]; C[Cqrs.Ninject.Akka.AkkaNinjectDependencyResolver] --> A; D[Cqrs.Tests.Substitutes.TestDependencyResolver] --> B;
```

The diagram illustrates the inheritance hierarchy for the `IDependencyResolver` interface. At the top is the `Cqrs.Configuration.IDependencyResolver` interface. Below it, two concrete classes implement this interface: `Cqrs.Ninject.Configuration.NinjectDependencyResolver` and `Cqrs.Tests.Substitutes.TestDependencyResolver`. The `NinjectDependencyResolver` class further inherits from `Cqrs.Ninject.Akka.AkkaNinjectDependencyResolver`.

Cqrs.Ninject.Configuration.NinjectDependencyResolver

Cqrs.Tests.Substitutes.TestDependencyResolver
